

iDrink

Probiotic Supplement Digest Support

Why choose iDrink

「No artificial colors or flavors」

「Non GMO」

「Gluten free」

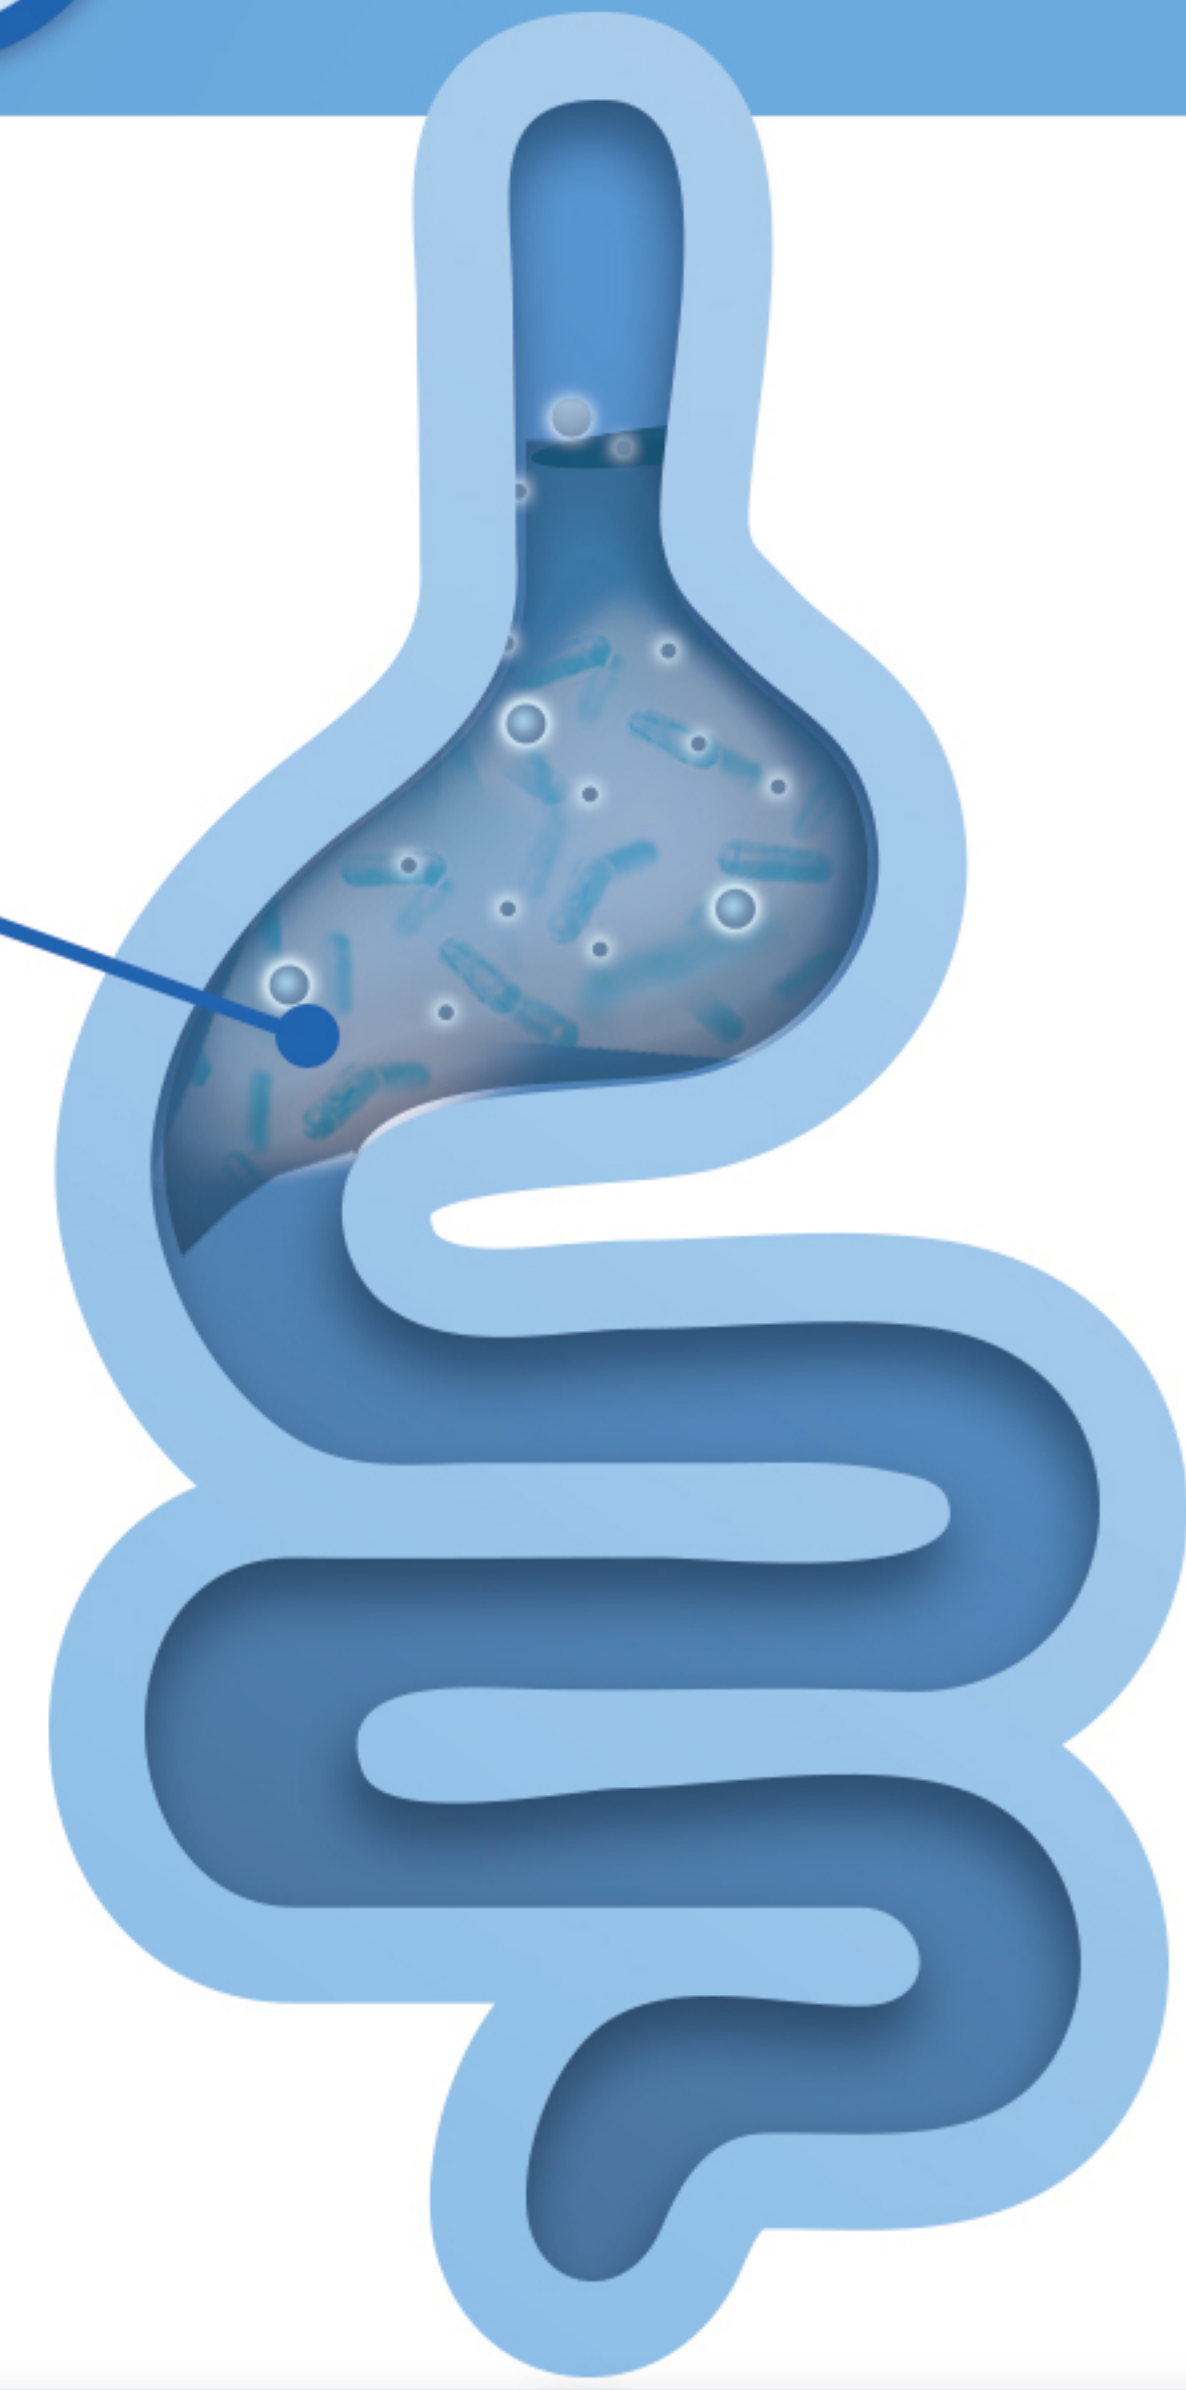

「Non dairy」

Ingredients backed by clinical research suitable for everyday use

• 8 probiotic strains proven* to **survive** in the high acidity of stomach

*CN Patent, CN109453207A

Who choose iDrink

— Enhance digestion needed

— Irregular diet, no appetite

— Lack of exercise

— Hamburger, pizza, steak fans

Directions

Blend it into water

Eating directly

Blend it into milk,
juice, yogurt and others

Why trust iDrink?

National Hi-Tech Inc, HACCP and ISO22000 Certified High-Tech Enterprise

Q1 What is the Hirschian extinction reaction?

In the process of being eliminated, harmful bacteria will release more harmful substances than usual, or change the metabolic pathway to produce new harmful substances to resist probiotics. While these harmful substances will make the body feel worse, which is medically called "Hershman's extinction reaction". It only lasts for only 1 to 2 weeks in usual, and the body recovers. The Hessian extinction reaction is actually a recovery reaction.

Q2 Whether eating probiotics can lead to dependence?

Probiotics are fundamentally different from drugs in that they are not absorbed by the body, but live in the gut and work. Human and bacteria are essentially a symbiote, and the intestinal flora is also known as a new organ of the human body, so there is no so-called dependence.

Q3 Who are the suitable groups?

Not fit for 0~3 years old babies, children older than 3 years old and adults are suited.
